

## Financial Modeller

Curtis Banks are looking to recruit a Financial Modeller to analyse operational data to create better understanding on how to take the business forward in the future.

The position and duties will include, but not limited to:

- Work under the supervision of the Chief Executive Officer
- Develop, deliver and implement financial models and financial modelling tools for a range of different propositions.
- Be responsible for providing good quality, timely financial modelling advice to the business, in a way that non specialists can readily understand
- Recommend financial strategy
- Update financial models during periods of change and following business actions.
- Maintain confidentiality and demonstrate discretion at all times when dealing with sensitive information
- Be responsible and accountable for own personal development i.e. prepare and actively operate personal training/development plans
- Assist in the preparation of Board papers as required
- Support any other finance or business initiatives as needed.

**The successful candidate will have:**

- Strategic understanding of business and how different financing structures can add value
- In-depth understanding of financial modelling and associated tools
- Experience of designing, building and populating financial models
- Degree level education or above
- Excellent IT skills, particularly in the use of excel spreadsheets

Duration: Full time, permanent.

Salary: Negotiable dependant on experience.

Person specification: A full Job Description is available on request.

All candidates will be asked to confirm their eligibility to work in the UK at interview stage, and to provide evidence of it on appointment. Please note that successful candidates will be subject to a criminal records and personal credit check.

How to apply: Please send your CV, along with a brief covering email to - [recruit@curtisbanks.co.uk](mailto:recruit@curtisbanks.co.uk)
